Outpost24

CORPORATE BROCHURE

Keeping your data yours

Outpost24 provides state of the art vulnerability management technology and services that simplify the complex security needs of modern businesses. Since 2001, we have been pioneering customizable tools and solutions that meet the needs for vulnerability management from small companies to large enterprises through scalable, easy to use solutions. We continue to pursue simplicity and usability in all aspects of our development.

Today, over 2000 commercial and government clients in more than 40 countries trust Outpost24 to protect their internal and external networks. Outpost24 secures organizations within a wide range of business sectors, including governmental institutions.

We offer leading, proactive security solutions in the following areas:

Vulnerability Management

Outpost24 provides easy to deploy and intuitive solutions to help you continuously identify, remediate and mitigate vulnerabilities on your network. Automated vulnerability scanning is performed on a frequent basis to discover vulnerabilities that are then rated and reported with a recommended remedy.

Web Application Scanning

Outpost24 offers the most secure, accurate, and advanced web application security option available - SWAT. SWAT brings unparalleled accuracy, a no-touch configuration, and fully managed web application security to all sizes of organizations. SWAT scans thousands of web pages for vulnerabilities and provides a choice between high volume efficient scanning, or unrivalled quality and accuracy for high value applications.

PCI Compliance

Outpost24 offers a single, user friendly tool based on leading technology to verify and prove the compliance of credit card data handling with PCI Data Security Standard. As an Approved Scanning Vendor (ASV) by the PCI Security Standards Council, Outpost24 assists customers in achieving PCI compliance with perimeter, internal and web application scanning.

Our Products

The advanced, proprietary technology of Outpost24 is market leading in vulnerability coverage and scanning accuracy. We transform time consuming and tedious tasks into automated steps that fit into existing organizational processes, thereby reducing cost and time investment for our customers. All of our products can be coupled with implementation and full managed service by our in-house technical experts.

Secure Web Application Security (SWAT)

SWAT™ is the most accurate and production safe alternative for security management of high value web applications. This technology offers organizations the benefit of persistence of tools, continuous security monitoring of applications, and an accuracy at the level of experienced penetration testers. The unrivalled accuracy makes SWAT perfect for high value and high availability assets.

External Vulnerability Scanner

OUTSCAN™ is an on-demand security tool that enables organizations to assess and manage their external network vulnerabilities. OUTSCAN works from Outpost24's secure operations center to scan network perimeters, identify vulnerabilities and provide simple reports to identify cost efficient remediation.

PCI ASV Compliance Scanner

OUTSCAN™ PCI is an on-demand, SaaS PCI compliance verification tool, based on the OUTSCAN technology, to verify and prove the compliance of credit card data handling with PCI Data Security Standard. As an Approved Scanning Vendor (ASV) by the PCI Security Standards Council, Outpost24 assists customers in achieving and maintaining PCI compliance.

Internal Vulnerability Scanner

HIAB™ (hacker-in-a-box) is an automated security solution that enables organizations to assess and manage threats against internal networks. HIAB™ is installed within the internal network and identifies vulnerabilities on servers, workstations and other devices. With HIAB, scanning, reporting and data analysis is performed within the appliance, ensuring that data never leaves your internal network.

HIAB on-demand products

HIAB™ PORTABLE is an on-demand security scanning solution enabling professionals to assess and manage internal vulnerabilities on the go or on an ad hoc basis. HIAB Portable excels in customizable reporting and screening of non-managed and non-connected networks as well as penetration tests.

HIAB™ SMALL BUSINESS is an on-demand security scanning tool for small organizations to diagnose their internal network vulnerabilities and to protect sensitive data. HIAB Small Business offers efficient vulnerability management to identify network exposures, detect vulnerabilities and to automate reports, for easy problem solving on internal networks.

Our Services

Outpost24 offers professional services to organizations looking for an added element of human intelligence to their security program. Our ethical, technical experts – professional "hackers" – hold certifications such as Certified Ethical Hacker and CISSP and conduct detailed tests for technical and logical security errors according to OWASP guidelines. They then evaluate and document possible points of attack on your networks or applications and explore points of weakness as a cybercriminal would. We offer the following areas of professional services:

Network & Infrastructure Assessments
- Internal & External Audits
- Wireless Network Audits
- IPv4 & IPv6

Web Application Testing
- Authenticated
- Unauthenticated
- Stress & DoS Testing
- Applets
- REST
- HTML5

Mobile Application Testing
- iOS
- Android
- Windows Mobile

Our Customers

Outpost24's proactive security solutions have helped over 2,000 companies avoid exploitation of their corporate networks. Our customers range from small local businesses to multinational organizations, and span a wide range of sectors including transport, finance, education, government, healthcare, retail, wine & beverage, space industries and multimedia.

The Outpost24 Advantage

Security-focused Development
Outpost24's products and services are inherently secure; our technology is developed in the context of security needs and not driven solely by compliance directives.

Direct Customer Support
Our 24x7 direct support at no additional cost ensures that all customers get the technical support they need, on-demand, by qualified technology experts.

Management-minded Reporting
We help you bridge technical vulnerability management details and business interests by offering reports and overviews that demonstrate the success and impact of vulnerability management efforts over time.

High Accuracy
Our innovative scanning tools are continuously improved to be the most accurate scanners on the market; Outpost24 maintains a uniquely low average of false positives.

Unlimited Scalability
Outpost24 tools fit internal and external networks of all sizes and can integrate with different appliances to increase scalability and span vast networks.

Virtualization
Outpost24 supports all major virtualization platforms, resulting in simple, swift and seamless deployment, distribution and management of HIABs.

Innovation
Outpost24 foresees market and organizational demands in the context of security needs and continually develops features to help our customers proactively protect their assets.

Our People
We believe that our customer relationships are best handled by local partners; Outpost24 understands the unique differences between markets and employs expert international sales and technical support teams that are present throughout the world.
