

OUTSCAN™ PCI Compliance

Market Landscape

All businesses that store, process or transfer credit card data must comply with Payment Card Industry Data Security Standards (PCI DSS) as a result of increased security challenges and escalating credit card fraud. PCI DSS are comprehensive standards that include requirements for security measures, policies, procedures, network architecture and software designed to help organizations proactively protect customer credit card data.

Failure to comply can result in significant fines for companies, and considerable damage to revenues, corporate reputation and customer confidence.

Achieving and maintaining PCI DSS compliance is a complex, ongoing process that requires adopting a proactive security approach through continuous identification of risks and remedial outcomes.

Our Solution

Outpost24 is a certified Approved Scanning Vendor (ASV) by the PCI Security Standards Council and offers OUTSCAN™ PCI, an extension of our OUTSCAN™ vulnerability management tool designed specifically to verify and prove PCI DSS compliance. OUTSCAN™ PCI examines network perimeters, identifies vulnerabilities and sorts actionable remedies, and can repeatedly scan until all criteria are met to effectively protect the integrity of cardholder data and verify compliance.

OUTSCAN™ PCI Features and Specifications

Built on our advanced OUTSCAN™ technology, OUTSCAN™ PCI is designed to help you verify and prove PCI DSS compliance. Some of the features our solution includes are:

Centralized administration:

- » Secure access to the system using your normal web browser
- » Easy to define PCI Scope
- » Online dispute management
- » Verification scanning to confirm remediation actions
- » 2-factor authentication log-in

Automated functionality:

- » Flexible scan scheduling and planning
- » Compliance reports generation for online submission

Analysis:

- » Quickly visualize which vulnerabilities cause compliance failure
- » Dispute findings online through the report view
- » See proposed solutions, directly, for all identified vulnerabilities

Benefits

- » Immediate deployment
- » Secure and confidential reporting
- » Unlimited 24/7 qualified support
- » Quick, easy to use solution that streamlines PCI compliance work

Getting Started

OUTSCAN™ PCI is available on-demand and immediately deployable from our data center. This tool is suitable for organizations of any size, is simple to manage, and does not require specialized technical knowledge. As with all Outpost24 tools, direct support is available 24/7 from our team of qualified technology experts.
